1.	<p>Slovak Research and Development Agency under Contract no. APVV-19-0102. " Effectiveness of Pre-Trial Proceedings – Examination, Evaluation, Criteria, and the Impact of Legislative Changes."</p> <p>The issue of the effectiveness of law, or its individual subsystems, which also include criminal law and especially in relation to the procedural branches of these subsystems, is very broad and is of interest not only to legal theory and practice, to the professional public, but also to the general public. Effectiveness is an even more important concept in relation to criminal law, because it is this branch of law that most significantly interferes with fundamental human rights and freedoms. It can be stated that measuring the effectiveness of criminal proceedings is important. To date, no research project has taken place in the Slovak Republic that would focus on assessing legislative changes in relation to the effectiveness of criminal proceedings. The project is implemented in cooperation with the Academy of the Police Force in Bratislava and the Faculty of Law of Comenius University Bratislava. 1st Lt. JUDr. Patrícia Krasna, PhD., LL.M. is the researcher of the project for the Academy of the Police Force in Bratislava and within the project she deals with the issues of victims of crime, elements of restorative justice and institutes that increasingly affect the effectiveness of the pre-trial proceedings.</p> <p>The most significant outputs:</p> <p>BCI KRÁSNÁ, Patrícia - ŠIŠULÁK, Stanislav Victim of crime, injured party and restorative justice in continuity [print, electronic document] / author Patrícia Krásná, author Stanislav Šišulák, reviewed by Lucia Kurilovská, reviewed by Marek Kordík. - 1st ed. - Bratislava: Academy of the Police Force in Bratislava, 2021. - 141 p. - ISBN 978-80-8054-882-7. - ISBN 978-80-8054-883-4. 3.	<p>National project "Increasing Slovakia's resistance to hybrid threats by strengthening public administration capacities"</p> <p>The main goal of the national project is to increase Slovakia's resistance to the effects of hybrid threats by implementing a complex set of measures including optimization of processes in security agencies, adjusting the regulatory framework, increasing capacities and acquiring new competencies and skills by security agencies. The main activities will be implemented within the project, namely Activity no. 1: Strengthening the analytical, conceptual and professional capacities of public administration in the fight against hybrid threats and Activity no. 2: Creating educational cycles and incorporating the Issue No. of hybrid threats into the curricula of the Academy of the Police Force in Bratislava for the needs of the police and public administration. As part of Activity no. 2, the Academy of the Police Force in Bratislava will carry out comparative research, the main goal of which will be the determination of uniform and unambiguous procedures in the field of identification, suppression and prevention of manifestations of hybrid threats. At the same time, the educational activity of students of the Police Academy in Bratislava, members of the Police Force of the Slovak Republic and employees of the public administration working in the detection and prevention of manifestations of hybrid threats will be coordinated.</p>
4.	<p>Project „WATCH - Society in the Mirror of Water – long-term strategic research in wastewater analysis as a tool for monitoring public health and environmental safety.” Project code 401101C229.</p> <p>The WATCH project is based on the idea that wastewater contains reliable traces of what is happening in the population – from viruses and bacteria to drugs, pharmaceuticals and micropollutants to environmental threats. The key is the use of artificial intelligence, which clears, connects and interprets these data. The WATCH project develops new technologies – AI platform SEWAGE MIND, CitySenseAI digital twin city, interactive DATA-KOCKA, as well as new biosensors and LIDAR air measurements. WATCH has the potential to put Slovakia on the map of countries building modern data-driven public health infrastructure. It is a project that can cross borders and offer solutions for international metropolises.</p>
