[SABAYOVÁ, Mária (100%)]</p> <p>The scientific monograph examines the phenomenon of disinformation in the context of Central European regions, especially the Czech Republic and the Slovak Republic. It provides an overview of the current development of disinformation campaigns, their main actors and impacts on contemporary society. It focuses on theoretical and practical aspects of disinformation, including their impact on public opinion, political processes and the security situation. It discusses how modern technologies, such as artificial intelligence and digital tools, contribute to the spread of false information and how these tools can be abused to manipulate the public. It also addresses economic and legal issues related to the fight against disinformation. It analyzes the legal framework and administrative measures implemented at the national and European levels, and examines their effectiveness in the context of current challenges.</p> <p>According to the criteria of the Scientific Council of the Academy of the Police Force in Bratislava determining the segmentation of outputs, this is a scientific study that has objective significance in several countries, not only in the same region, which is why the author has taken the liberty to classify this output in the A+ category.</p>
