Bratislava: Academy of the Police Force in Bratislava, 2005. - ISBN 80-8054-335-6. Sign.: F 18891 [MURDZA, Karol]</p> <p>In the present scientific monograph, the author has comprehensively analyzed the essence of security and new security risks in the contemporary global risk society. Partial conclusions of this work, published in several scientific studies at home and abroad, contributed to the formulation of the security strategy of the Slovak Republic and to the creation of conceptual documents in the framework of the NATO accession processes in the given period. The thesis characterized the security orientation of the citizens of the Slovak Republic, its manifestations and consequences in an innovative way. Using the results of the international research MATRA II, in which the author participated as a co-investigator, important suggestions in the field of security education and training were formulated. The uniqueness of this output was that it already pointed to several problems related to security orientation and disorientation that we are still struggling with today.</p> <p>According to the criteria of the Scientific Council of the Academy of the Police Force in Bratislava determining the segmentation of outputs, it is a scientific monograph of objective importance in several countries, not only in the same region, which is why the author has taken the liberty to classify this output in the A+ category.</p>

In this context, he defines organized crime as a multisectoral security threat in an innovative way and identifies its specific negative penetrations in the military, political, economic, social and environmental sectors in several countries. The originality, international importance and contribution of the entire publication, which has become a prestigious project of the international security community, was recognised by German Ambassador J. Trebesch in his introduction to the publication with the following assessment: "this detailed security policy analysis is an excellent source of information" and therefore provides all NATO member states with a perfect overview of the current security situation.</p> <p>According to the criteria of the Scientific Council of the Academy of the Police Force in Bratislava determining the segmentation of outputs, this is a scientific monograph of objective importance in several states not only in the same region, which is why the author has taken the liberty to classify this output in the A+ category.</p>
