In: Policajná teória a prax [print] : časopis Akadémie Policajného zboru v Bratislave. - ISSN 1335-1370. - Roč. 30, č. 4 (2022), s. 37-68.</p> <p>In research we present the most important stages of the development of law enforcement in Hungary and the current status of security sciences in the Slovak Republic. We describe the most important milestones and the scientific foundations of law enforcement. Given that we are talking about a multidisciplinary science, we approach the definition and basic characteristics of law enforcement from several points of view. In the other part of the research, we present. We point out the difference between operative-search activities and intelligence activities, and touch upon the current change in the perception of criminal intelligence in the Europe union context.</p> <p>According to the criteria of the Scientific Board of the Academy of the Police Force in Bratislava stipulating the classification of outputs, it is an expert article which has an objective meaning for multiple states not only in the region, therefore, the authors allowed themselves to classify the output in the A- category.</p>

Jozef Stieranka, aut. Ľudovít Fidler - In: Bezpečnostní teorie a praxe[print, elektronický dokument]. - ISSN 1801-8211. - ISSN 2571-4589 - . Roč. 30, č. 2 (2024), s. 37-58.</p> <p>Within the framework of the scientific research task "National Model of Criminal Intelligence" VYSK No. 231, implemented at the Criminal Police Department of the Academy of the Police Force in Bratislava, the authors of the paper analyse and introduce the theoretical background that needs to be accepted in the creation of the national model of criminal intelligence at the strategic level and at the operational level of crime detection in the Slovak Republic. They focus on the taxonomy of basic concepts and theoretical definition of the risk management process, which they apply to the crime detection process. They justify the need for implementation of a risk-based approach to crime detection at the strategic and operational levels in the interest of increasing security.</p> <p>According to the criteria of the Scientific Board of the Academy of the Police Force in Bratislava stipulating the classification of outputs, it is an expert article which has an objective meaning for multiple states not only in the region, therefore, the authors allowed themselves to classify the output in the A- category.</p>

In: Policajná teória a prax [print] : časopis Akadémie Policajného zboru v Bratislave. - ISSN 1335-1370. - Roč. 30, č. 2 (2022), s. 38-53.</p> <p>In this study, the authors emphasize that, given the social significance of the risks arising from hybrid threats, citizens rightly expect from police and security authorities, they will be able to identify them and thus participate in the implementation of adequate measures in the system of control of these forms of anti-social behavior. Accepting the above, by processing the opinions of the addressed members of the competent police and security authorities and the professional public, they present a possible alternative to the procedures implemented for the purpose of identifying hybrid threats.</p> <p>According to the criteria of the Scientific Board of the Academy of the Police Force in Bratislava stipulating the classification of outputs, it is an expert article which has an objective meaning at the national level, therefore, the authors allowed themselves to classify the output in the B category.</p>

	<p>In this expert article, the author, based on his knowledge of police and security practices, defines the need for and activities associated with the performance of tasks related to crime control by members of the Police Force in cooperation with the public. In fulfilling this ambition, he focuses particular attention on forms of cooperation that are regulated by the Police Force Act and the Criminal Procedure Code. Respecting the above knowledge, it submits proposals de lege ferenda to the professional public which, in its opinion, can improve the involvement of citizens in the performance of tasks in the area of crime control and thus increase the effectiveness and efficiency of criminal proceedings.</p> <p>According to the criteria of the Scientific Board of the Academy of the Police Force in Bratislava stipulating the classification of outputs, it is an expert article which has an objective meaning at the national level, therefore, the author allowed himself to classify the output in the B category.</p>

Ľudovít Fidler, rec. Ján Nociar, rec. Michaela Kiššová. In: Policajná teória a prax [print] : časopis Akadémie Policajného zboru v Bratislave. - ISSN 1335-1370. - Roč. 31, č. 1 (2023), s. 24-43.</p> <p>The topic of this paper is psychological workload and burnout syndrome in the context of personality in the police profession. The aim of the research in this area was to find out whether there is a relationship between psychological workload or burnout syndrome and individual personality characteristics in terms of the six-factor model of personality. The research found that there is a relationship between the factors of the six-factor personality model (conscientiousness, honesty, and extroversion) and burnout rates. We also found that the factor conscientiousness has an effect on the rate of experiencing psychological workload. These results suggest that one alternative for making career progression more effective is to consider psychological assumptions from the aspect of the police officer's personality.</p> <p>According to the criteria of the Scientific Board of the Academy of the Police Force in Bratislava stipulating the classification of outputs, it is an expert article which has an objective meaning at the national level, therefore, the author allowed himself to classify the output in the B category.</p>
