In: Projjustice [electronic document]: scientific-professional internet journal for law and justice. - ISSN 1339-1038. - Vol. 9, no. 12 (2020), p. 1-15. [ŠKRINÁR, Tomáš (100%)]</p> <p>The legal nature of the institute of administrative expulsion is given by a wide range of legal regulations at the international, European and national levels. As part of his scientific work, the author assesses and analyzes the institute in question from the point of view of the three levels of law. It focuses not only on legislation but also on case law, whether the case law of the European Court of Human Rights or the European Court of Justice. The aim of this work is to defend the opinion on the legal nature of the institute of administrative expulsion.</p> <p>According to the criteria of the Scientific Board of the Academy of the Police Force in Bratislava determining the segmentation of outputs, this is a scientific work that has an objective significance in several countries not only in the same region, which is why the author dared to classify this output in A + category.</p>

In recent years, the Schengen Area has been exposed to numerous challenges. The migration crisis that began in 2014 subjected many Schengen countries to severe strain. The war in Ukraine also represents a significant challenge for Schengen states. These circumstances, together with constant changes in the field of migration, require countries of the Schengen Area to continuously adapt to the evolving situation. It is important to monitor compliance with Schengen rules by the Member States, a purpose served by the Schengen evaluation and monitoring mechanism. In this contribution, we present the current state of the Schengen evaluation and monitoring mechanism.</p> <p>According to the criteria of the Scientific Board of the Academy of the Police Force in Bratislava determining the segmentation of outputs, this is a scientific work that has an objective significance in several countries not only in the same region, which is why the author dared to classify this output in A + category.</p>

	<p>The paper deals with the institute of reintroduction of internal border control and its development. It is an institute which is an exception to the right to free movement of persons within the Schengen area. Internal border controls have been abolished by entry into Schengen, but as there are exceptional situations where internal border controls need to be carried out, an institute has been set up to reintroduce internal border controls. The development of this institute ran from a simple adjustment of two grounds to the simultaneous adjustment of several grounds for the reintroduction of internal border control. The author not only presents the historical development, but also deals with the development de lege ferenda.</p> <p>According to the criteria of the Scientific Board of the Academy of the Police Force in Bratislava determining the segmentation of outputs, this is an article from international conference that has an objective significance in several countries not only in the same region, which is why the author dared to classify this output in A+ category.</p>

In: Security Technologies for Police, Forensic and Commercial Practice [print, electronic document] / rec. Jozef Stieranka, rec. Miroslav Felcan, rec. Branislav Kandra. - Bratislava: Academy of the Police Force in Bratislava, 2019. - ISBN 978-80-8054-808-7. - P. 186-227. Sign .: F 19996, SF 1925, E-Book 94 [ŠKRINÁR, Tomáš (100%)]</p> <p>In the subject chapter of the university textbook, the author deals with selected areas of security technology legislation, privacy and personal data protection legislation, legal aspects of telecommunications and information technology, camera system, traffic security technologies and other areas of selected security technologies. This issue is discussed not only in terms of national law, but also in terms of international and European law. The author emphasized the analysis of the most important aspects of the use of security technologies and their possible influx into various areas of life, especially privacy. At the same time, the author also offered his legal opinions on the issue and its solution.</p> <p>According to the criteria of the Scientific Board of the Academy of the Police Force in Bratislava determining the segmentation of outputs, this is a chapter in the university textbook, which has an objective meaning in several countries not only in the same region, and therefore the author dared to classify this output in A-category.</p>
5.	<p>AFD ŠKRINÁR, Tomáš Human rights of irregular migrant women / aut. Tomáš Škrinár. In: Quo vadis Schengen? [electronic document]: collection of scientific and professional contributions from the conference with international participation held on November 8, 2022 / rest. Vincent Holubiczky, rec. Anton Tallo, rec. Paul Augustín. - Bratislava: Academy of the Police Force in Bratislava, 2023. - ISBN 978-80-8054-994-7. - pp. 29-40.</p> <p>The article deals with the human rights of irregular female migrants. The fact that migrant women cross external borders irregularly does not mean that they do not enjoy protection. Migrant women, as vulnerable persons, even have a higher level of protection than other persons. The paper introduces the human rights of female migrants, at the international, European, and national level. It lists the most important provisions of the legal documents regulating the mentioned issue. It deals specifically with women's human rights in relation to crossing external borders.</p> <p>According to the criteria of the Scientific Board of the Academy of the Police Force in Bratislava determining the segmentation of outputs, it is a university textbook, which has an objective meaning in several countries not only in the same region, and therefore the author dared to classify this output in B category.</p>
