We analyze compliance with the principle of proportionality from three points of view - constitutional, administrative, and criminal. In the research, we will focus on defining the limit and degree of legitimacy of the intervention by a member of the Police Force into the fundamental rights and freedoms of the person against whom the service intervention is performed. Based on a critical legal analysis of relevant legal and internal regulations, decisions of public authorities, and professional and scientific literature, we will bring qualified conclusions and guidelines usable in applied police practice, which will specify how to perform a duty so that its implementation is following the law.
