The textbook moves the understanding of criminalistics towards criminalistics' methods that are of the broadest professional public interest. The content of the textbook is prepared for the target group – students of secondary schools, higher vocational schools and universities of security focus. This specification was conditioned by the practical needs of the graduates so that they are perfectly oriented in the possibilities of forensic examination and in the evaluation of the results of expert investigation in the field of forensics. The author's team's aim was a brief but comprehensible expression of the essence of the scientific basis of forensic examination and forensic identification. Sign.: F 19588, SF 1905</p> <p>The scientific monograph deals with the criminal activity committed by members of the Police Force, addressing not only the general reasons for the occurrence of criminal activity by members of the Police Force, but also the accompanying phenomena of these specific and particularly serious crimes. It collects and statistically evaluates data on the criminal activity committed by members of the Police Force from 1996 to 2017, which represents a period of 22 years. The author of the monograph collected significant data during this period from official sources of the Ministry of Interior of the Slovak Republic, which confirms the fact that these data can be considered highly valid and reliable. Such extensive and long-term research, together with an erudite scientific approach to the processing of the collected data, predicts the probability of the pronounced resulting forecasts and considered development trends. According to the criteria of the Scientific Board of the Academy of the Police Force in Bratislava stipulating the classification of outputs, the work is a scientific monograph of an objective significance for multiple states not only in one region, therefore, the author allowed himself to classify the output in the A+ category.</p>

2.	Researcher - Project APVV-19-0102 "Effectiveness of pretrial proceedings - investigation, evaluation, criteria and impact of legislative changes". Faculty of Law Comenius University in Bratislava. Efficiency is an even more important concept in relation to criminal law, because this branch of law interferes with basic human rights and freedoms in the most significant way. Several researches show that the efficiency and speed of criminal prosecution is a much better preventive measure than the constant increase

	<p>of criminal rates. The perpetrator is more deterred from committing a criminal activity by the knowledge that he will be sanctioned for his actions than by the severity of a specific sanction. It can be concluded that measuring of the effectiveness of criminal proceedings is important. To date, no research project has been carried out in the Slovak Republic that would focus on the assessment of legislative changes in relation to the effectiveness of criminal proceedings.</p> <p>AFD ŠIŠULÁK, Stanislav Criteria for the effectiveness of preliminary proceedings / author Stanislav Šišulák.
