According to a Globsec survey conducted at the end of 2021, up to 56 per cent of Slovak citizens believe in various conspiracy theories, which is the highest among the Visegrad Four countries (Czech Republic, Hungary, Poland, and Slovakia), but we also occupy an unflattering leading position among the countries of Central Europe and the Western Balkans. It turns out that the disinformation about the COVID-19 pandemic, the mysterious domination of the Jews over world events, the forthcoming occupation of Slovakia by the United States army, or the invasion of Ukraine by Russia, after being introduced to it on dubious portals, as well as in the media, is believed by people irrespective of their level of education.</p> <p>According to the criteria of the Scientific Council of the Academy of the Police Corps in Bratislava determining the segmentation of outputs, this is a chapter in a scientific monograph, which has objective significance in several countries, not only in the same region, which is why the author has taken the liberty to place this output in the A category.</p>

	<p>The paper focuses on the use of alternative sentences in Slovakia. Alternative or alternative punishment is actually a quasi-punishment. Basically, it should not be a punishment. We do not consider suspended imprisonment to be a punishment, fine or penalty of compulsory or forced labour. It should therefore be a penal commitment.</p> <p>According to the criteria of the Scientific Council of the Academy of the Police Corps in Bratislava determining the segmentation of outputs, this is a chapter in a scientific monograph, which has objective significance in several countries, not only in the same region, which is why the author has taken the liberty to place this output in the A category.</p>
