1.	<p>In the scientific monograph in question, the author elaborated on the theoretical foundations of pedagogical communication from the aspect of its peculiarities at the university and the theoretical and methodological basis for the implementation of optimal pedagogical communication in the teaching of private law disciplines. Using the results of research conducted in the conditions of the Academy of PZ in Bratislava, he presented a pedagogical experiment that verified communication intentions of effective pedagogical communication in private law disciplines as a model of pedagogical communication, which can also be used in teaching some other legal disciplines. The monograph contributes to the further development of didactics in civil law and other private law disciplines. It can be an inspiring source for optimizing the process of creating subject and trade didactics of other legal disciplines. The uniqueness of this output is also strengthened by the fact that in Slovak and Czech provenance, the subject matter has not yet been interpreted in such an extensive and scientifically holistic form.</p>

He pointed out their importance, including the individual components of these tools, which allow obtaining a relatively comprehensive view of the applied tools and processes. At the same time, he presented the results achieved in individual areas, obtained by analyzing the results of the applied components of the essential tools, which allow knowing the achieved state of educational activity and the prospects for the growth of its positive results. The results of analyzes obtained by applying these tools and the procedures set out in them by the management of the Academy of the Police Force, departments, and teams of researchers make it possible to identify strengths and weaknesses in individual areas. Of these, the most important, identified in the other period, resulting from the content of the thematic areas into which the chapter of the monograph is divided, are presented in its conclusion. The publication output in question can be an inspiring source for further research in the subject area to optimize the training of security experts.</p> <p>According to the criteria of the Scientific Board of the Academy of the Police Force in Bratislava, this is a scientific output that has an objective significance in several countries of a particular region, which is why the author dared to classify this output in category A.</p>

[WÄLDL, Ľuboš (50%) - HALÁDIK, Jozef (50%)]</p> <p>A necessary prerequisite for ensuring a qualified and objective evaluation of the quality of higher education institutions in the field of pedagogical and scientific activities is the creation of a system of internal and external quality assurance of higher education institutions. In this paper, the authors presented output information in terms of individual components of the currently applied system of internal quality assurance of the activities of the Academy of PZ in Bratislava in the field of education. The information in question was obtained by research carried out in 2011/2012. The authors paid immediate attention to the interpretation of critical components of the quality assessment system with an emphasis on those areas considered to be the most important from the point of view of the performed analyzes. The research results provided important information on the practical implementation of educational activities and related proposals for measures in the future. The results also provided information on the need to respect the legitimate requirements for improving the system of internal quality assurance of educational activities.</p> <p>According to the criteria of the Scientific Board of the Academy of the Police Force in Bratislava determining the segmentation of outputs, it is a scientific article that has an objective meaning in at least two different countries of a particular region, which is why the author dared to classify this output in category A-.</p>

The author focused on interpreting the central aspects of the regulation of civil law prevention and liability within the draft amendment to the Civil Code published in 2018. He emphasized the concept of modernization of substantive civil law discussed by the professional public by regulating contract law by a particular law. Using comparison, analysis, and synthesis, the interpretation focused mainly on the new facts of general and special liability for damage and the proposed changes in the field of damages. In this context, he reflected on the Czech legislation, which contains similar facts. The elements of the originality of this output are strengthened by the fact that the author also looked at the analyzed issues from the perspective of the intertwining of the personal and public levels of responsibility within the activities of members of the Police Force.</p> <p>According to the Scientific Board of the Academy of the Police Force in Bratislava criteria determining the segmentation of outputs, it is a publication output that has an objective significance in at least two different countries of a particular region. The author focused on the historical milestones of this process and interpreted the current issues of recodification with emphasis on the focal aspects of the issue in the period after 2015. He emphasized the proposed amendments, which In 2015, they did not find majority support within the solution concepts. However, the author considers the legal regulation of interpreted institutes in the draft Civil Code to be beneficial to the subjects of civil law relations, enabling the complete application of equality of subjects, the autonomy of will, and other principles of private law. This context is also reflected in the personal law codes of most European countries that contain such legislation. Elements of the originality of this output are strengthened by the fact that the author perceives the analyzed issues from the perspective of security and maintaining legal certainty in civil law relations.</p> <p>According to the Scientific Board of the Academy of the Police Force in Bratislava criteria determining the segmentation of outputs, it is a publication output that has an objective significance in at least two different countries of a particular region. Sign.: F 20694 [WÄLDL, Ľuboš (100%)]</p> <p>Reflecting on the global pandemic COVID-19, the author analyzed its impact on the exercise of parental rights and responsibilities of parents who do not live together. The company encounters cases of violation of agreements and court decisions in the area of exercising parental rights and obligations in everyday reality. During the crisis, this problem became more significant due to misinformation spread mainly on social networks. The author interpreted the central substantive and procedural aspects of the legal regulation of the exercise of parental rights and obligations compared with measures taken by the competent authorities of the Slovak Republic in order to prevent the spread of COVID-19. In the context of the introduction and prolongation of the state of emergency, he emphasized, in particular, the issues of parental contact with the child and alternating personal care. He presented his findings in a publication with original elements in solving legal and security problems.</p> <p>According to the criteria of the Scientific Board of the Academy of the Police Force in Bratislava determining the segmentation of outputs, this is a contribution that represents a particular contribution to the development of security sciences in the national context, which is why the author dared to classify this output in category B.</p>

Sign.: F 19025 [WÄLDL, Ľuboš (100%)]</p> <p>The recodification of civil procedural law represents a fundamental historical milestone in developing Slovak civil proceduralism. In this article, the author reflected on current issues of recodifying civil procedural law in the context of adopting three new procedural codes. He emphasized the legal regulation of the Civil Procedure Code aimed at ensuring the efficiency, fairness, speed, and economy of court proceedings and improving law enforcement. It focused on selected institutes existing in the previous regulation and refined in the process of recodification, as well as on new institutes and provisions of the Code, the regulation of which could raise possible questions in their application in practice. He presented his findings through a traditional legal interpretation. He analyzed and interpreted the provisions taken from the previous legal regulation and interpreted them in comparison with their regulation in the Code of Civil Procedure. The paper can be a suitable source for disseminating empirical knowledge at the level of professional scientific debates.</p> <p>According to the criteria of the Scientific Board of the Academy of the Police Force in Bratislava determining the segmentation of outputs, this is a contribution that represents a particular contribution to the development of security sciences in the national context, which is why the author dared to classify this output in category B.</p>

Based on the defined object and the subject of research activities, students of individual levels of the study had the opportunity to express their opinion on the quality of teaching and the work of teachers in the implementation of the teaching process. The questionnaire method was used to obtain opinions, in which structured and unstructured questions were applied. As a result, the quality of the system of educational activities implemented by teachers in individual subjects were determined mainly in terms of the quality of the content of teaching, the procedural side of teaching, and the quality of professional level and pedagogical competence of teachers teaching individual subjects. Based on the analysis of the achieved results, conclusions and recommendations were formulated in the evaluation report, which is reflected in the essential components of the educational process. Specifically, they reflect on its concept, content, methodology, development of teachers' scientific and pedagogical competencies, approach to students, organization of teaching, provision of material conditions, and the area of knowing the quality of the educational process.</p> <p>The most significant outputs:</p>

Following the goals set in this task, he devoted himself to evaluating the state of development of the subject and professional didactics. An inseparable part of the interpretation of the research results was the target area, content and procedural aspects of teaching, the teacher's activity, and the students' teaching work. As well as the area of application of material means of teaching. The findings presented in the conclusions show that the legal departments achieve excellent results in developing didactics of a group of legal subjects. However, there are differences between them in the stage of completion. The common denominator of the evaluation of the activities of the departments is that so far, the didactics of teaching a legal subject, or trade union didactics, has not been processed as a comprehensive system of knowledge in this area. Departments or individuals usually focus only on solving partial problems arising from the immediate implementation of the teaching process. In conclusion, the author also formulated recommendations in the field of didactics for teaching the group of legal subjects for teachers of departments of the group of legal subjects and other relevant subjects.</p> <p>The most significant outputs:</p> <p>The most significant citations:</p> <p>Final report of the research project: " Didactics of teaching subjects at the Academy of PZ in Bratislava: project of a partial scientific research task of the integrated scientific research task "Education of students of the Academy for the performance of professional activities in the conditions of cooperation of police and security structures in the European Union."/Jiří Seknička, Vladimír Blažek, Ľuboš Wäldl, Ľubomír Cigánik, Jan Váňa, Oliver Brezinský, Marcela Varšová, Marian Suja.
